23. Embryo transplant calves will receive the same registration and transfer privileges as natural born calves for the same enrolled fee provided the donor dam or recipient dam is enrolled in the Total Herd Enrollment Program. The first calf registered to such dam will be free and an enrollment fee will be charged for each additional transplant calf registered to the donor dam during the twelve-month period.

59. In the event the sire verification or parent verification is not completed by the applicant as required and within the time required, the Association shall act as it deems necessary to enforce compliance including withholding registrations, requesting further testing, suspending or expelling a member or refusing an application for membership in the Association.
60. The Board of Directors shall designate the manner of sire verification or parentage verification from time to time as well as the laboratory or laboratories which will be authorized to conduct such sire verification or parentage verification.

63. Where an animal has tested positive for any chromosomal abnormalities, the registered owner of such animal shall be immediately notified in order that the owner may within seven (7) days of such notification have the animal re-tested at a laboratory designated by the Board of Directors.
64. Once a bull has tested positive for any chromosomal abnormality (either after the original test if the owner chooses not to have a second test, or after the second test has been done where the owner so chooses) then the Association shall advise its' membership as soon as reasonably possible in the Association's Breed Publication.

Genetic Defects

65. The Association shall maintain a list of defects known to be inherited and accepted by a two-thirds (2/3) majority vote at an Annual Meeting to be disqualifying Genetic Defects. Notwithstanding anything to the contrary in these By-laws, animals expressing any such defect shall be ineligible for registration.
66. Any animals suspected of having a genetic defect must be reported to the Association as soon as possible.

Upgrading

67. In order to facilitate the development of the Simmental Breed of cattle in Canada through the widest possible genetic base, the Association will encourage breeders to engage in an upgrading program using established breeds.
- (a) Upgrading to a Purebred registered status may be accomplished by using registered Purebred or percentage bulls/females as designated in the upgrading table attached as Table 1. To be eligible for recordation, an animal must be at least one-half (1/2) Simmental blood and either the sire or dam must be registered with the Association. The non-Simmental registered purebred sire (from a recognized breed registry as determined by the Association) must have the pedigree entered into the Association's database.
